PRODUCT PROPERTIES

- leight beige O/W emulsion containing urea, panthenol and bisabolol
- lamellar emulsion base
- absorbed quickly, slightly greasy
- silicone-free
- perfumed or perfume- and fragrance-free
- HACCP-compliant (fragrance-free)
- EU Ecolabel for 1 L collapsible bottles
- vegan

APPLICATION

After work, apply PHYSIODERM® CUREA carefully on the clean and dry skin. Rub in the cream evenly, paying particular attention to vulnerable areas such as between the fingers and around the nails. The product should be dosed carefully in order to avoid excessive use.

A product evaluation sheet can be downloaded.

DESCRIPTION

PHYSIODERM® CUREA cares for sensitive and occupationally stressed skin. Due to the naturally moisture-binding ingredient urea and the skin care substance bisabolol, PHYSIODERM® CUREA supports the regeneration process of previously damaged skin. The care cream additionally contains the moisture-binding and anti-inflammatory skin care substance panthenol. PHYSIODERM® CUREA has a highly efficient and lasting skin care effect. The cream is absorbed quickly and is also suitable for nail care. Moreover, the cream enhances the skin's water-holding capacity, it supports the regeneration of the skin's natural protective layer and it makes the skin smooth.
PHYSIODERM® CUREA in 1 L Collapsible Bottles has been awarded the EU Ecolabel.

The chemical composition and physical properties of the **lamellar cream base** of PHYSIODERM® CUREA make it **ideal for skin care**. The low washout effect of lamellar cream bases - compared to typical O/W emulsions - has the effect that the skin's own barrier structure with its characteristic composition is largely preserved, especially in case of occupationally stressed skin. PHYSIODERM® CUREA is able to support the regeneration process when the skin is confronted with attrition dermatitis or eczema.
PHYSIODERM® CUREA PURE (perfume- and fragrance-free version) can be used safely for personal hygiene in the food industry in consideration of the respective application instructions.

CUREA / CUREA PURE

DERMATOLOGICAL COMPATIBILITY
PHYSIODERM® CUREA's dermatological compatibility has been carefully tested and proven. A printed certificate is available.

COATING COMPATIBILITY
The Fraunhofer Institute for Manufacturing Engineering and Automation confirms the general coating compatibility of PHYSIODERM® CUREA.

PRODUCT QUALITY
The product is manufactured according to GMP (GOOD MANUFACTURING PRACTICE) requirements. The bacteria count is microbiologically tested on a regular basis and is under 100 bacteria per gram.

FIRST AID
If PHYSIODERM® CUREA accidentally gets into your eyes, rinse immediately with plenty of lukewarm water. If a burning sensation still persists, consult an eye doctor as measure of precaution.

STORAGE INSTRUCTIONS
PHYSIODERM® CUREA will keep for at least 30 months (from date of manufacture) if stored unopened at room temperature in the original packaging. The Period After Opening (PAO) is indicated on each tube / bottle.

STATUTORY REGULATIONS
PHYSIODERM® CUREA is subject to the Regulation (EC) No 1223/2009 on Cosmetic Products, but not to the CLP or the REACH Regulation. Moreover, skin care products are received as part of the Personal Protective Equipment (PPE).

ENVIRONMENT
All tubes and bottles are made of polyethylene and after being completely emptied, they can be disposed of with other polyethylene waste. The empty packaging should be disposed of in a container specially designed for recycling. Packaging is labelled accordingly. The tube body consists of at least 30 % recycled plastic.
Using the product in the correct amounts minimizes the environmental impact and saves money. Moreover, the 1 L Collapsible Bottles have been awarded the EU Ecolabel DE/030/115.

HALAL AND KOSHER REQUIREMENTS
To the best of our knowledge, the ingredients of PHYSIODERM® CUREA comply with halal and kosher requirements.
