- lip balm with beeswax, vitamin E and high-quality shea butter
- high protection with SPF 50
- protection against UVA and UVB radiation
- water-resistant
- without mineral oil
- silicone-free
- perfume- and fragrance-free

PLEASE NOTE

The application of UV protection products does not exonerate from the application duty of other prescribed precautionary measures. Intensive midday sun should be avoided. Even UV protection products with a high SPF do not provide complete protection against UV radiation.

DESCRIPTION

LIPCARE FROST & SUN protects and cares the lips intensively, especially in case of cold weather, wind, dry air and intensive sunlight.

The product is especially suitable for rough, chapped and dry lips. Due to their special skin structure, the lips are more sensitive to outside influences than other areas of the skin. They also have only limited natural protection against sunlight. Therefore, intensive UV radiation can be particularly harsh on the lips and, with frequent or strong sun exposure, contribute to sun-induced skin damage.

A suitable lip balm with sun protection can help to provide specific protection for the lips during outdoor activities. LIPCARE FROST & SUN combines intensive care with additional protection against UV radiation and is suitable for use in every season.

APPLICATION

Apply LIPCARE FROST & SUN on your lips several times a day, as needed. The lip balm can be easily applied and does not leave a colored film on the lips.

Before intensive sun exposure, apply LIPCARE FROST & SUN evenly on the clean and dry lips. Apply generously as small amounts offer low protection only. In order to maintain the UV protection, apply LIPCARE FROST & SUN several times a day. However, the renewed application does not extend the protection time, but rather re-establishes the old protection status which has diminished in the meantime. In general, LIPCARE FROST & SUN should be reapplied every two hours.

DERMATOLOGICAL COMPATIBILITY

The dermatological compatibility of LIPCARE FROST & SUN has been carefully tested and proven. A printed certificate is available.

Physioderm®

LIPCARE FROST & SUN

PRODUCT QUALITY

The product is manufactured according to GMP (GOOD MANUFACTURING PRACTICE) requirements.

FIRST AID

If LIPCARE FROST & SUN accidentally gets into your eyes, rinse immediately with plenty of lukewarm water. If a burning sensation still persists, consult an eye doctor as measure of precaution.

If large quantities have been swallowed accidentally, rinse mouth out with water. Get medical advice/attention if you feel unwell.

STORAGE INSTRUCTIONS

LIPCARE FROST & SUN will keep for at least 30 months (from date of manufacture) if stored unopened at room temperature in the original packaging. The Period After Opening (PAO) is indicated on the stick.

Store it in a cool and dry place (at room temperature). Close tightly after use.

STATUTORY REGULATIONS

LIPCARE FROST & SUN is subject to the Regulation (EC) No 1223/2009 on Cosmetic Products, but not to the CLP or the REACH Regulation. Moreover, skin protection products are received as part of the Personal Protective Equipment (PPE).

ENVIRONMENT

Cap and rotating base are made of PP and after being completely emptied, they can be disposed of with other PP waste. The outer packaging is made of paperboard (PAP) and should be disposed of with the paper and cardboard recycling. Packaging is labeled accordingly.
