

Skin Protection and Skin Care

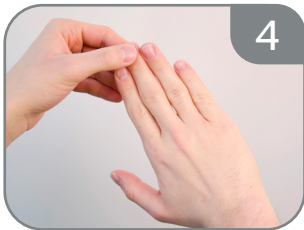

Apply a small amount of cream on the back of your hand.

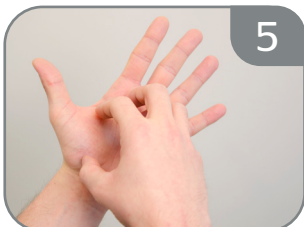

Rub in the cream evenly and

pay particular attention to vulnerable areas such as between the fingers.

Do not forget the bed of the nails and the fingertips.

Finally, spread the rest in the palm of your hands and – if necessary – under your nails.

Note:

Skin protection products are used before and during work. Skin care products are applied to dry and clean skin after work.
